

CLIMEPORT PROJECT WILL BE PRESENTED IN NAPLES

CLIMEPORT Project has been selected as representative for the “exchange of solutions to enhance the role of territories in the MED area, through improved transports hubs, port management, maritime security and an integrated logistics development System” of the MED Programme as an example of initiative already launched after the first call of proposal.

Thus, CLIMEPORT will participate in the Naples meeting to be held on November 16th-17th..

The objective of this environmental initiative is to encourage competitiveness of the Mediterranean countries and ensure growth and employment for the following generations in favour of environmental protection in the context of sustainable development. This programme has a budget of more than 250 million Euros. Among all the projects approved in the first call of the MED programme CLIMEPORT has been awarded being invited to attend a meeting of capitalization on November 16th in Naples to explain the achievements reached in the project and to be the speaker of that axis of work in the annual event of MED, that will take place on November 17th.

This day, called by the Managing Authority and the Joint Technical Secretariat of the MED program, is the first of a series of events whose primary purpose is to create added value in projects through the development of synergy, dissemination and transfer of results, both at the stage of capitalization and the conclusion of the program.

Five debates will be carried out with several objectives, especially the identification of a strategy for the promotion and the enhancement of innovation. The CLIMEPORT project, with an innovative approach in creating added value in promoting sustainable land development, will have very soon the opportunity to demonstrate its contribution to the inter-regional cooperation as a leader of the MED Zone and generating resources in the fight against climate change.
